

Precision cleaners Dr. Wack / ZESTRON with record year - world's leading electronics manufacturers trust in know-how from Ingolstadt

Ingolstadt, Germany - The electronics industry is one of the world's largest and most important industries as measured by its global production and market volume. The top 5 largest producing countries are China, Japan, USA, South Korea and Germany. At a market volume of approximately 4 billion euros, an amount that has nearly doubled in the past decade, it is one of the largest industries in the world.

The development of individual process solutions have become more important than ever within the past few years. Printed circuit boards, installed in mobile phones, tablets and computers, require high precision cleaning after production to ensure smooth functionality and prevent failure.

As cleaning challenges increased, so too did the need for rapid product development and customized cleaning solutions. Recognizing this need early, ZESTRON developed products to meet the industry requirements while becoming the world's market leader in electronic precision cleaning. With six globally linked Technical centers across the Americas, Europe and Asia, ZESTRON will be opening its 7th location in South Korea this year.

As a second generation private company, its success is measured by its sales figures. 2014 resulted in a 10% growth compared to the previous year, wherein the American and Asian markets resulted in increases of 15% and 20%. The company continues to reinvest its earnings in additional personnel as well as research and development to continuously grow and provide global support. In the past year, the staff was increased by 10%, which made ZESTRON and the Dr. O.K. Wack GmbH one of Germany's most attractive employers.

Revolutionary product developments such as the concentration measurement system ZESTRON@EYE as well as the establishment of the knowledge and expertise platform in electronics cleaning, the ZESTRON Academy, underline the innovative strength and the market significance of the Bavarian company.

Company Information

The company founded in 1975 by Dr. Oskar K. Wack is divided in two business divisions. ZESTRON is a manufacturer of cleaning agents and is well-known as a world leader in the electronic precision cleaning. The "Consumer" branch is represented in the segments automobile, motorbike, bicycle and outdoor care with the brands A1, P21-S, CW 1:100, S100 and F100 and is one of the leading providers. The central principle, to bring only new solutions to the market or to improve existing products significantly, determines the company's philosophy to this day. Over 200 employees are working globally working for the company group, approximately 140 people in the headquarters in Ingolstadt. In addition to ambitious expansion plans abroad the German location also is continuously expanded and strengthened.
